ID: PIUS20230001

Part A

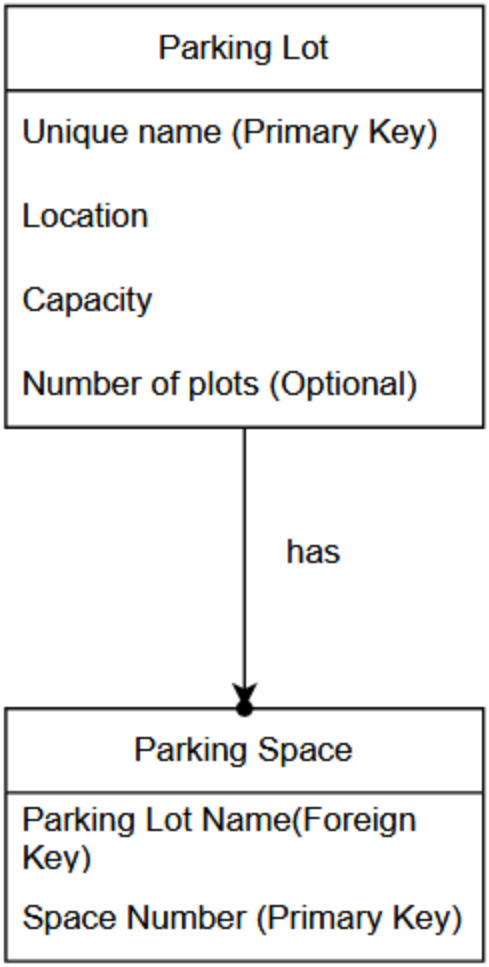

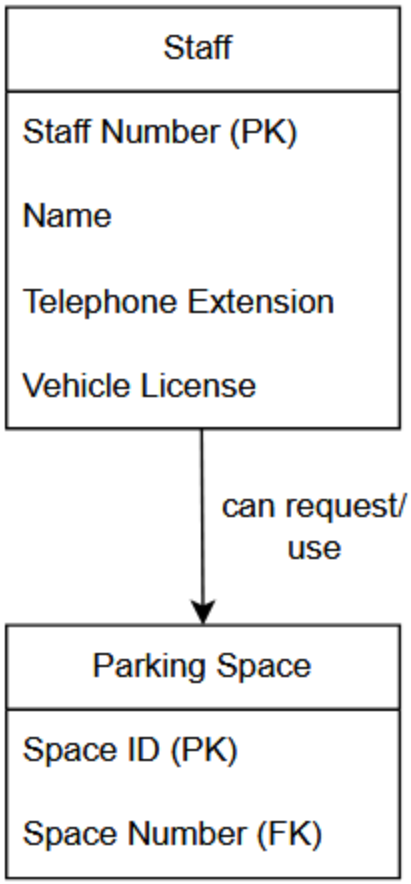

Part B

Parking Lot
Unique name (Primary Key)
Location
Capacity
Number of plots (Optional)

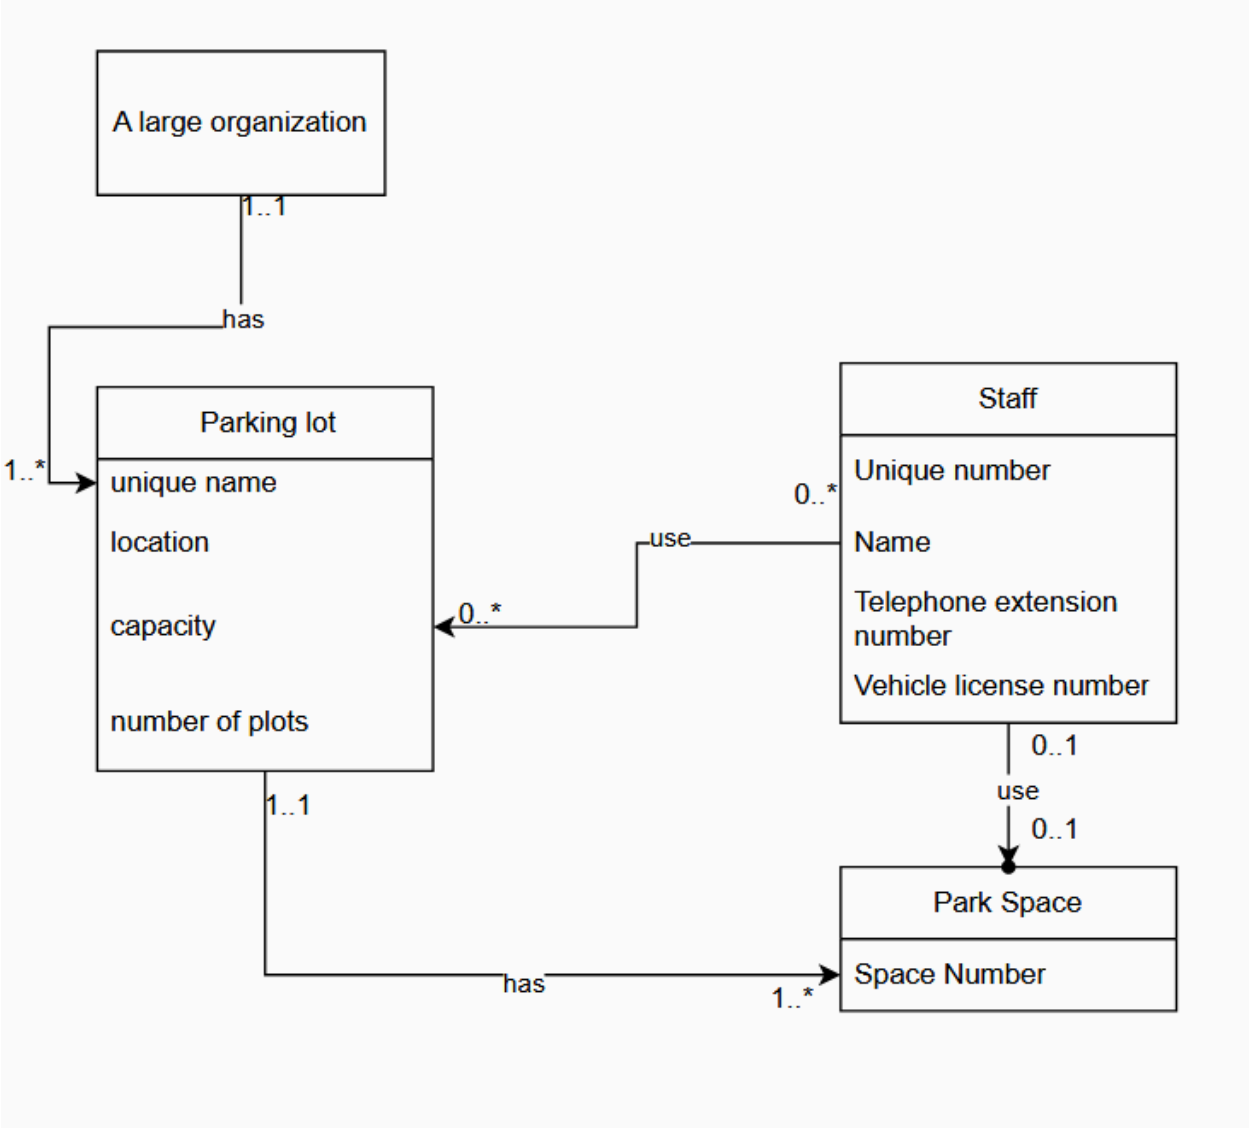

Part C

Parking Lot
Unique name (Primary Key)
Location
Capacity
Number of plots (Optional)
has
Parking Space
Parking Lot Name(Foreign Key)
Space Number (Primary Key)

Part D

Staff
Staff Number (PK)
Name
Telephone Extension
Vehicle License
can request/ use
Parking Space
Space ID (PK)
Space Number (FK)

Part E

Assumption

- A large organization has many parking spaces. Thus, one to many parking lots. From parking lots' perspective, one to one.
- There are many parking lots. But we focus on a single parking lot. So, a parking lot is used by a staff. Alternatively, a staff uses a parking lot.
- Parking lots are used by Staff. Thus, many to many. But there can be zero parking lot used by staff or there is no staff to use parking lot. Therefore, there could be zero parking lot to many staff and zero staff to many parking lots.

- Each parking lot has parking spaces, which are uniquely identified using a space number. Thus, it could be one parking lot to many parking spaces and one parking space to one parking lot.
- Members of staff can request the sole use of a single parking space. Thus, it is one to one. However, there could be zero parking space used by a staff or there could be zero staff for using a parking space. Thus, zero staff to one parking space and zero parking space to a staff.
